

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

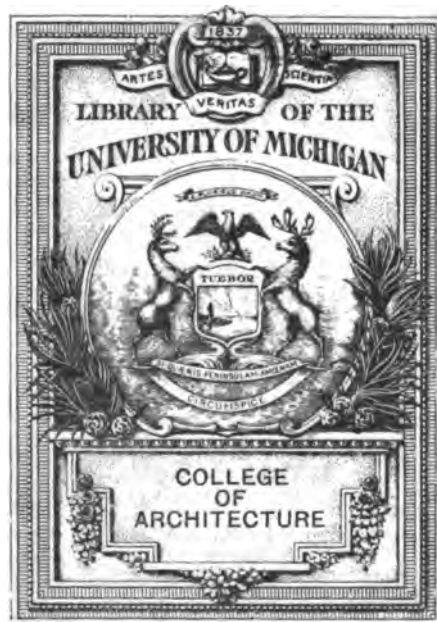

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## Acknowledgment

THE Architectural League of New York desires to here record its sense of indebtedness to those Architects, Painters and Sculptors, who by generous loans of their works year after year make possible these exhibitions, and thereby very materially contribute to the growth and promotion of Architecture and the allied fine arts.

-----

The officers and members of the Architectural League of New York wish to express to the advertisers, appreciation of their liberal support which has very materially aided in the publication of this catalogue.

—————

A number of these books are retained for sale and will be forwarded post-paid upon receipt of seventy-five cents. These and catalogues of former years may be obtained by addressing the Secretary of the Club.

DESIGN FOR STAINED GLASS  
SAMUEL HOWE, Architect, New York

## The Development of the Architectural League

THE Architectural League had its origin in the Architectural Sketch Club, formed in the fall of 1879, which held its meetings in the rooms of Howard Walker and William A. Bates, at No. 45 West 35th street, and the members were F. H. Bacon, William A. Bates, Alfred E. Barlow, P. P. Furber, Cass Gilbert, Thomas Hastings, Clarence Johnson, John Riley and C. H. Walker, most of whom were at that time in the employ of Herter Brothers. In 1880 the name was changed to the Architectural League with a view to the affiliation of decorative painters and sculptors. By the spring of 1881, however, most of the former members had gone to Europe to study and travel, and a new organization was effected, among whom were Charles I. Berg, Clarence H. Blackall, Arnold W. Brunner, Edward H. Clark, John L. DuFais, John H. Duncan, Wm. C. Hazlett, John Beverley Robinson, J. A. Schweinfurth, Bernard Vonnegut and Daniel W. Willard; on February 18th the following were elected as the first officers: Daniel W. Willard, president; Clarence H. Blackall, secretary, and John H. Duncan, treasurer, and rooms were secured on the upper floor of a building on the north side of Fourteenth street, between Broadway and Fifth avenue. The work of the League at this time was chiefly devoted to architectural sketches and problems. By the winter of 1885 that interest had subsided, the rooms on West Fourteenth street had been given up, and with John Beverley Robinson as president, the meetings were held with monthly dinners at Morello's

Restaurant, and the walls were hung with foreign sketches by the members who had been abroad and other architectural subjects by various members.

During the incumbency of John L. DuFais and the second term of Mr. Robinson, the League gained many members and was incorporated November 2d, 1888. It continued to grow during the four successive terms of Russell Sturgis, but though the social features were successful and the financial conditions satisfactory, the membership was not strictly and entirely professional and therefore the constitution was amended limiting the qualification of all future candidates to those who had studied or who were directly engaged in the practice of architecture or the allied arts. For a time the monthly dinners continued to be held at Morellos' ; then club rooms were rented on Forty-second street, opposite Bryant Park, and the annual dinners, with the exhibition, took place at Ortgies' Galleries on Fifth avenue, between Thirty-fourth and Thirty-fifth street.

In 1892, on the completion of the building of the American Fine Arts Society, at 215 West Fifty-seventh street, the League, as one of its component bodies, obtained permanent quarters there and now maintains offices, rooms for meetings and a professional library, which by purchase and donation is steadily growing in value and importance, and is recommended to the use of members. Whereas very many members have shown their devotion to the League in other ways, no one was more loyal than the late Samuel P. Avery in his generosity to the library.

The exhibitions have been held annually, (generally during the month of February), since 1886, and have gradually become to be of national importance, since here are represented many typical examples of the latest work of the architects, sculptors

and decorative painters throughout the United States. The admission is free to the public, except on two days of each week, when there is more ample opportunity for careful study of the exhibits. The opening of the exhibition with the annual dinner is the chief occasion of the year, when resident and non-resident members unite to honor special guests and to hear the discussion of topics of professional interest of the day. The reception on the following day invariably brings together a large and representative company by special invitation, and the interest of the general public is further stimulated by the series of three lectures which are given during the continuance of each exhibition—all of which have tended to encourage the growing and intelligent appreciation of the objects of the League.

The New York Chapter of the American Institute of Architects established in 1904 a medal of honor to be awarded for distinguished merit in an executed work of architecture ; but as there were so few entries for this prize at the last exhibition, no award was made. It is hoped that the photographs and drawings for this competition will hereafter lend an additional interest to future exhibitions.

Membership in the Architectural League of New York is now recognized by consuls of the United States, upon presentation of proper certificate, and the courtesy of free admission, with permission to sketch in foreign art galleries, is granted by the authorities.

"Architecture in the Far East."

BY C. W. SFOUGHTON.

Wednesday, February 21, at 8.15 P. M.

"Technical School in Pittsburgh."

BY HENRY HORNBOSTEL.

## Twenty-First Annual Competition For The Gold and Silver Medals

The Gold and Silver Medals will be presented to the competitors submitting the designs placed first and second, respectively.

### CONDITIONS.

1. The competitors must be residents of the United States and under the age of thirty years.
2. All designs submitted shall be the exclusive and individual work of the contestants, and no studio or other collaborated work shall be received.  
If the work of any of the contestants be challenged, as being other than here understood and implied, the contestant so challenged and the challenger will be given a hearing before the Committee on Competitions and Awards, and if the charge be proven to the satisfaction of the Committee, such contestant shall become ineligible for any of the awards.
3. All drawings shall be made in conformity with the following programme :

### Medal Competition.

#### A SMALL CHAPEL TO ST. PETER;

#### BUILT ON A ROCKY PROMONTORY OVERLOOKING THE SEA.

This chapel is to be built of stone, rugged in character and strong in appearance, approached on land by a road and from the shore by means of a small path, with landing for row boats. Its height above the sea level is about fifty (50) feet and it sets about one hundred (100) feet back from the shore. The Newfoundland fishermen are to attend religious services there before departing for the Fishing Banks.

The Chapel proper is to accommodate about one hundred (100).  
There is to be a small sacristy, and a belfry is necessary.

### DRAWINGS.

- One elevation of facade facing the sea.
- One longitudinal section or a cross Section.
- One plan showing surroundings, path, road, dock, etc.
- One perspective.

Each drawing is to be done on a sheet of paper 20 x 30 inches, and any style of rendering is acceptable.

### President's Prize.

#### OPEN TO MEMBERS OF THE ARCHITECTURAL LEAGUE ONLY.

The President of the League offers a Bronze Medal to be awarded to the best study for a MURAL PAINTING executed to the scale of one and a half inches to the foot, in oil or water color.

The subject will be "The Conclusion of Peace after War" and may be treated either symbolically or historically.

The study executed to scale (as above) shall represent a panel 14 feet high by 12 feet wide, and shall contain *at least* seven figures.

The male figures shall scale six feet three inches.

### Henry O. Avery Prize.

#### FOR SCULPTURE.

A prize of Fifty Dollars (\$50) presented by Samuel P. Avery, Esq., will be awarded for the best design for A WALL DRINKING FOUNTAIN IN A CITY STREET, TO COST \$500.

Models to be presented either in plaster or in composite clay, and to the scale of one inch to the foot.

Committee { HENRY HORNBOSTEL, *Chairman*.  
EDWIN H. BLASHFIELD,  
DANIEL CHESTER FRENCH.

THE Committee on Competitions and Awards reports, that in the competition for the Gold and Silver Medals, for which nine designs were submitted ; the Gold Medal was awarded to George A. Licht, of New York ; and the Silver Medal to Colister Morton Craig, of York, Pa.

In the Competition for the President's Prize, for which only three designs were submitted ; the Bronze Medal was awarded to Hugo Ballin, of New York.

In the Competition for the Henry O. Avery Prize, for which twenty-one designs were submitted, the prize was awarded to Antonin C. Skodik, of New York.

In the case of this last Competition the Committee wishes to report, that a number of the designs submitted, which were commendable and interesting artistically, violated the conditions of the programme in regard to cost ; and that this violation had to be taken into account in the judgment.

HENRY HORNBOSTLE, Chairman.

DANIEL C. FRENCH,

EDWIN A. BLASHFIELD.

**"INSPIRATION"—FIGURE FOR ART BUILDING, ST. LOUIS, MO.**  
**ANDREW O'CONNOR, Sculptor** **CASS GILBERT, Architect, New York**

# INTERLOCKING RUBBER TILING

MADE IN ONE QUALITY ONLY—THE BEST

NOISELESS, NON-SLIPPERY, SANITARY AND EXTRAORDINARY DURABLE

THE finest floor that can be laid in business offices, banking-rooms, court-rooms, vestibules, halls, billiard-rooms, cafés, libraries, churches, hospitals and hotels. It is especially adapted for steamships, yachts, etc., standing, without cracking or separating, the straining and racking of the ship. Each tile is interchangeable and distinct, but shaped so as to lock firmly into the surrounding tiles. The interlocking feature produces a solid rubber floor, unlimited in size or shape, with all the durability of the hard tile, without its liability to damage.

It can be put down over the original floor, either wood, stone, concrete or metal, without the interruption to business attendant on the laying of all other kinds of tiles.

Manufactured under our patent and sold only by us and our authorized agents. *Beware of infringers.* Estimates, designs and samples furnished on application. Send for special catalogue.

Patented and Manufactured Solely by

New York Belting and Packing Co., Ltd.

91-93 Chambers Street, New York

## A GOOD COLOR SCHEME

---

THE Chicago Varnish Company make the materials which produce the effect desired by the architect.

The fact that sample pieces of wood trim have been received from many of the leading architects of the United States and Canada with request to produce special effects, and which have been obtained to their satisfaction, lead us to extend a like service to all members of the profession.

Harmony of color is essential to the completed beauty of a room and stands next in importance to the architectural detail of an interior.

Margaret Greenleaf, Consulting Decorator of the Chicago Varnish Company, has extensive experience in working with architects, and will furnish, upon request, a complete decorative color scheme for a house or building of any character, submitting samples of every product to be used, including wood panels showing the various stains of enamels required.

# The American Ball-Bearing Pulley

Is a new and beautiful product. It is made throughout of all wrought metal and furnished with high-grade steel balls.

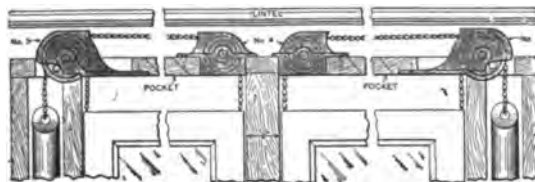

This pulley has been tested for wear equal to constant use in a window for forty years.

Friction is reduced to its lowest terms.

These pulleys are superior in every respect to anything hitherto put on the market.

# The Grant Overhead Pulley

Grant Pulleys for Twin Windows.

The overhead pulley obviates the use of lead weights as it gives more pocket room. These pulleys can be used in single, triplet and quadruple windows.

The Turner Patent Anti-Friction Drawer Slides and Supports.

They are the only draw slides on the market that are absolutely noiseless. A drawer fitted with the Turner Attachment cannot fall from the case when pulled out suddenly.

Send for New Catalogue.

## A NOTABLE PICTURE

THE New Hanover Bank Building occupies the center of the picture. There are also shown the New York Stock Exchange, the Commercial Cable, Manhattan Life, Arthur, Gullender, American Surety, Equitable and Western National Bank Buildings. Comparing these towering structures with the old Sub-Treasury, seen in the foreground, a striking example is afforded of the transformation which Otis Elevators have effected in the appearance of the city.

## TO THE ARCHITECT

We serve two masters! The oldest since Man came into the world—Horticulture and Architecture. Our business is to husband the one, to obey the unwritten laws of the other. We build houses of glass—greenhouses, nurturing the plants, the flowers, the fruits, and the vegetables. The useful and the beautiful, giving the right amount of light and shelter, and producing artificially just the temperature they need, Hot or Cold, to develop the best possible results. And in the building we endeavor to supply the living, active principles of true architecture, by observing the rules of good planning, by the right use of features that add interest to large buildings without loss of dignity, and by the adroit contrivance of heating equipment capable of the most delicate adjustment. The modern architect's office to-day, can design almost any building, be it useful or beautiful, or both; however, we stand ready to execute any suggestions or sketches of the architect, and to that end our draughting office is at his service.

 ZURICH PARIS LONDON BERLIN VIENNA GLASGOW.

**MASTER CLOCK**

## **DYCKERHOFF PORTLAND CEMENT**

is made in Germany. When first introduced in the United States, some twenty-five years ago, its superior strength, correct chemical composition and absolute uniformity were quickly appreciated and placed it above all other Cements in the market. The Dyckerhoff brand maintains the original superiority;—its perfection has not been approached by any other Cement.

### Ligni Salvor Best Wood Preserver

is of a bright nut brown color which is very attractive, and produces a decidedly agreeable effect. Prevents rot or decay in wood exposed to moisture or climatic changes lengthening the life of the wood. Covering capacity from 300 to 350 square feet of dressed lumber. Largely specified by leading Architects on Dwellings, Churches, posts, porches, half timber work, shingles, verandas, Railroad Depots and sheds, Hospitals, Stables, Boat Houses, etc. It emphasizes the grain or fibre of the wood without killing or altering it, prevents warping or checking and to *Interior Work* and Trimmings, such as Doors, Panelings, Wainscoting, Window Sashes, Frames, flooring, etc., it gives as fine a finish as rubbed wax. For samples and further particulars apply to

## CARPETS MADE BY HAND

The luxurious furnishings of the modern home demand the highest grade of floor coverings. They must also possess these three important features: perfect harmony of color, correct style of design, and appropriate size.

In this connection we offer our unequaled facilities, enhanced by years of experience and wide foreign connections, for the execution of orders for carpets or rugs in the French Aubusson and Savonnerie, Berlin, Turkey and other weaves. The designs are prepared by our own artists to maintain the style of decoration in the carpet or rug, and the fabric is woven in one piece to fit the room where it is to be used.

We have in stock at all times a large collection of these beautiful floor coverings, woven by us in designs of the periods.

**Start Right !** Before a building is begun the steam heating question ought to be settled. If you want the maximum economy of fuel, fewest repairs and stoppages, lowest risk, and perfect control of temperature in heating, you must install the

### Webster System of Steam Circulation

which the foremost engineers and architects have put into the most important buildings in the country. Long use has tested and proved it best and most efficient.

*Write for booklet 33--H.*

**Warren Webster & Co.**

New York Office : 17 State St.

Camden, N. J.

## A Good Tin Roof

taken care of the same as other portions of a building makes *the best covering known*.

### It is

fireproof, light, not over costly, easy to look after and sure to last very many years; in fact, not unusually as long as the very structure on which it is placed.

The time is not far away when *every* one interested in building will realize *it does not pay* to put cheap, trashy materials on a roof, which, from their very *nature* cannot *help* but be short lived and unsatisfactory generally.

## "Scott's Extra Coated" Roofing Tin

has been distributed by us, the country over, more than *20 years*, and there are thousands of roofs made out of it in as good condition to-day as when they were put on long ago.

*It is always good.*

## "Follansbee Banfield Process" Roofing Tin

is another brand we make. The quality is extra fine. *We warrant it in writing* to wear not less than *15 years*, or be replaced at our expense.

THE MAKERS ARE

## WHEELER'S PATENT WOOD FILLER

Brings out the full life and beauty of the wood. Permanently sustains the finish. Goes further than any other wood filler, therefore it is more economical. Architects should insist on its being used as specified, to get proper results.

### A Word About Paint

Many of the most eminent chemists and painters of the country to-day admit that pure white lead in oil is not the best article for painting. It will not last at its best over three years, and adjacent to the seashore will chalk off in less than a year. Paint that lasts is made of silice, as especially ground by us, white lead and zinc in our **Breinig's Lithogen Silicate Paint** and in our **Lithogen White Lead**.

Architects will find these paints as much superior to other paints as our **Wheeler Filler** is to all other wood fillers.

### The Bridgeport Wood Finishing Co.

NEW MILFORD, CONN.

NEW YORK: 55 Fulton St. CHICAGO: 68-70 W. Lake St. PHILADELPHIA: 41-43 S. 3d St

On or before Feb. 1, 1906, we will open a Bureau of Information for Architects where we will show finished samples of various woods at 9 Arcade, Metropolitan Life Insurance Building, New York, and 8 Mint Arcade, Chestnut and Juniper Sts., Philadelphia. When visiting in these cities call and see us

## The Kelsey Warm Air Generator System

is a Fresh Air System of Heating and Ventilating for Homes,  
Churches and Schools.

Not an experiment, and because of satisfactory results  
secured, 28,000 have been sold since 1889 : :

It is a distinct type of heater, in construction and  
principle different from any furnace or boiler : :

**HEALTHFUL**, because it warms fresh air by best method. Warms large volumes  
of air properly and forces to exposed or distant rooms, so that an even, uniform  
temperature is easily maintained in every part of the building.

**ECONOMICAL**, because it has much greater heating surface per square foot of  
grate surface than any other heater, and utilizes all the heat to best advantage.

**HEATS** City or Country houses of any size, from five rooms to fifty, thoroughly in  
all kinds of wind or weather.

*If you think Kelsey claims are all theory*

send for booklet "Just a Few Houses," and for book of "Opinions"—112 pages  
of letters and fine houses Kelsey heated.

**KELSEY HEATING CO., Makers, Syracuse, N. Y.**

# “ Red Lead Oil Paint as a Rust preventive”

---

An article appearing under this title in the *Farben Zeitung* was recently reprinted in the *Oil, Paint and Drug Reporter* of New York. It describes at length some very interesting and unusually comprehensive experiments conducted in the Royal Technical Experimental Establishments under the auspices of the German iron industry. The experiments covered the different conditions that prevail when iron is used for building purposes, with a view to contrasting the value of different preventives of corrosion.

Iron treated in several different ways was subjected to exposure to (1) dry air, (2) atmospheric conditions (in open air), (3) smoke gases, (4) blast furnace gases, (5) water in mines, (6) sea water, (7) moist warm air in bilges and boiler rooms of ships.

The article describes fully the results obtained by each test, and gives as a general result the following:

“ On the whole, these experiments, conducted with an enormous expenditure of time and trouble, have conclusively proved that Red Lead coating is in most cases preferable to coppering, and even galvanizing, which latter has always enjoyed a special reputation as a rust preventive, and that therefore this coating is the best protective against iron rust hitherto known.”

Architects and engineers who are interested in metal construction can obtain a copy of this article from the
